**Cultural and Natural Diversity - Multiplier Event aCT**  
**Bragança, Portugal**  
**Centro Ciência Viva de Bragança e Natural Park of Montesinho**  
**6th and 7th November, 2021**

Two open days that intend to establish an aggregating space that is conducive to intercultural, pedagogical and scientific dialogue that allows to demonstrate the diversity and cultural enrichment that can be produced through life experience. It is aimed to acknowledge that we live in a society where the importance of welcoming and including citizens is fundamental. Centro Ciência Viva de Bragança, in close collaboration with the Polytechnic Institute of Bragança, creates a two day participatory Multiplier Event to involve a community of people residing in Bragança, with the aim of providing dialogue around the sociocultural aspects of the countries of origin and of the host country of the participants. These two days activities, as a complement to the curriculum and teaching, will facilitate, through inclusive scientific education, the independent development of these citizens, at the academic, social, personal and socio-emotional levels. The aim is the integration of different knowledge (biology, ecology and ethnography), with the experiences mentioned by the participants in the Multiplier Event.

## Programme

### Montesinho Natural Park

9:00h/12:00h - Field trip in different habitats, framing the region and the surrounding landscape to present the endogenous natural resources of Bragança.

### Centro Ciência Viva de Bragança

12:00h/13:00h - Multicultural and Cultural Diversity dialogues and activities that enabled the recognition of the citizens' social identity through differentiating markers (ethnicity, religion, beliefs, linguistics, nationality, tradition/culture, among others). Presentation of the main aCT outputs.

Co-funded by the  
Erasmus+ Programme  
of the European Union
